

HIACE SES'FIKILE

THE BEAT OUR CITY MOVES TO

There is a rhythm to our city, alive and composed by the people moving to its colourful energy. The Hiace is here to make sure we keep up with the tempo of the ever-present musical hustle and bustle. Purpose-built around the backbone of Toyota's hallmarks; Quality, Durability and Reliability – to become South Africa's most desired taxi. It has the exclusivity and comfort that people queue up for.

Whether it's the 14- or the 16-seater, here is a minibus that has the power to drive you in comfort, style and safety. The Hiace is here to turn up the volume and keep our people moving to the groove that is South Africa.

INTERIOR DASH

15 PASSENGERS** CAN BE SEATED COMFORTABLY

Homeward bound safe and sound

Our taxis play an essential role in getting many South Africans to their different destinations, due to the COVID-19 pandemic, we are all required to social distance to help stop the spread. In order to adhere to the distancing rules, while still safely transporting passengers to where they need to go, TSAM – the number one Taxi seller in South Africa – has developed a shield (Covid Driver Guard), to improve the drivers' protection so they can continue the job at hand in a safe and responsible way.

COVID DRIVER SAFETY GUARD**

Along with all the mandatory taxi recapitalisation safety specifications, the Hiace ensures that drivers and passengers are afforded the maximum protection with roof and window emergency exits, driver and front passenger airbags, central locking and safety belts for every passenger.

Also standard is the fitment of:

The Anti-lock Braking System (ABS) and Brake Assist (BA) technology help you navigate life's unpredictable moments with maximum safety. Hill-Assist Control (HAC) makes sure uphill take-offs are one less thing to worry about, and Vehicle-Stability Control (VSC) helps with cornering and prevents side skids, keeping you pointing in the right direction at all times.

DRIVER AND FRONT PASSENGER AIRBAGS

Traction Control (TRC) is an active safety system that helps improve driving stability on slippery roads. TRC keeps the wheels from spinning when starting or accelerating by controlling braking and engine output.

WINDOW EMERGENCY EXIT

*Available on 2.5D GL Bus 14-seater.
**Available on Ses'fikile models.

Model line-up:

Ses'fikile 2.7i petrol 16-seater
Ses'fikile 2.5i diesel 16-seater

And introducing...
The Hiace 2.5i diesel GL Bus 14-seater

The mover for the shakers

The Hiace has been given a modern polish to keep you shining through the city's ever-changing backdrop, while a redesigned heat panel and outside temperature display keeps you in touch and in tune with your surroundings. We've also redesigned the front bumper and radiator grille, the headlamps and rear combination lamps to ensure that everybody sees you coming.

The Hiace Ses'fikile 16-seater has maximised its interior space, so that all passengers are comfortably seated with ample cushioning and support. Passengers can easily stay refreshed throughout the day with two front cup holders in the 16-seater and 12 cup holders in the 14-seater bus. Both models come equipped with durable PVC flooring to prevent passengers from slip-ups.

With you for the long run

The 16-seater Ses'fikile has the option of a 2.7i four-cylinder VVT-i petrol engine (Variable Valve Timing – intelligent) or a 2.5i D-4D intercooled common rail turbo-diesel engine, both boasting low fuel consumption and reduced emissions, providing a satisfying and economical drive experience.

The 14-seater bus offers a 2.5i engine with diesel-common rail fuel injection and 5-speed manual transmission to effortlessly keep people moving and arriving at their destinations from sunrise to sunset.

2.7 VVT-i PETROL ENGINE

VVT-i (Variable Valve Timing – intelligent) engine technology combines outstanding drivability with low fuel consumption and reduced emissions.

2.5 D-4D DIESEL ENGINE

Common rail technology allows for the precise measurement and injection timing of fuel. The result? More power, better fuel consumption, less noise and less pollution.
